

Drop BMR1 Nearfield Monitors

Quick Start Guide

1. Install stand to the speaker using included accessory pack.

Vertical Orientation

Horizontal Orientation

2. Connect the passive speaker to the active speaker using speaker cable provided.

3. Plug in the power supply into the active speaker first, then connect the power supply to 100~240 V_{ac} source.

4. Connect to audio source and play:
- a. Analog in – Via 3.5 mm jack interconnect cable.
 - b. Digital in – Bluetooth

5. Button Function
- a. **Default Mode** – Analog In. Indicated by a solid white light, this is the first mode when the device is powered on.

- b. **Bluetooth Mode** – To enter this mode, single press from the default mode. When connecting for the first time, the device will automatically enter pairing. Pairing Mode is characterized by fast pulse blinking of the light. If connection is made, the light will turn to a solid blue. When idle and no active connection, the light will slow blink. To pair to a different device, holding the button for 3 seconds will activate Bluetooth Pairing Mode (must be in Bluetooth mode to do this).

- c. **Headphone Mode** – Mode will be skipped when no headphones are detected. When in this mode with headphone connected, the speaker output will be disabled until the mode is switch back to either default or Bluetooth. It is also possible to use a gaming headset with mic support when the BMR1 is connect with the supplied TRRS cable plugged into a compatible device such as a laptop.

- d. **Master Reset** – Long press for 12 seconds to activate master reset in any mode. The light will turn off for a short period and light up again signaling a successful reset.
